NWS Hanford Midweek Storm System Briefing

Weather Forecast Office

Hanford, CA

Monday, October 19

Presenter: Stephen McCoy

Key Points

- A storm system is expected to move into the region by late Tuesday night into early Wednesday morning and continuing through Thursday afternoon.

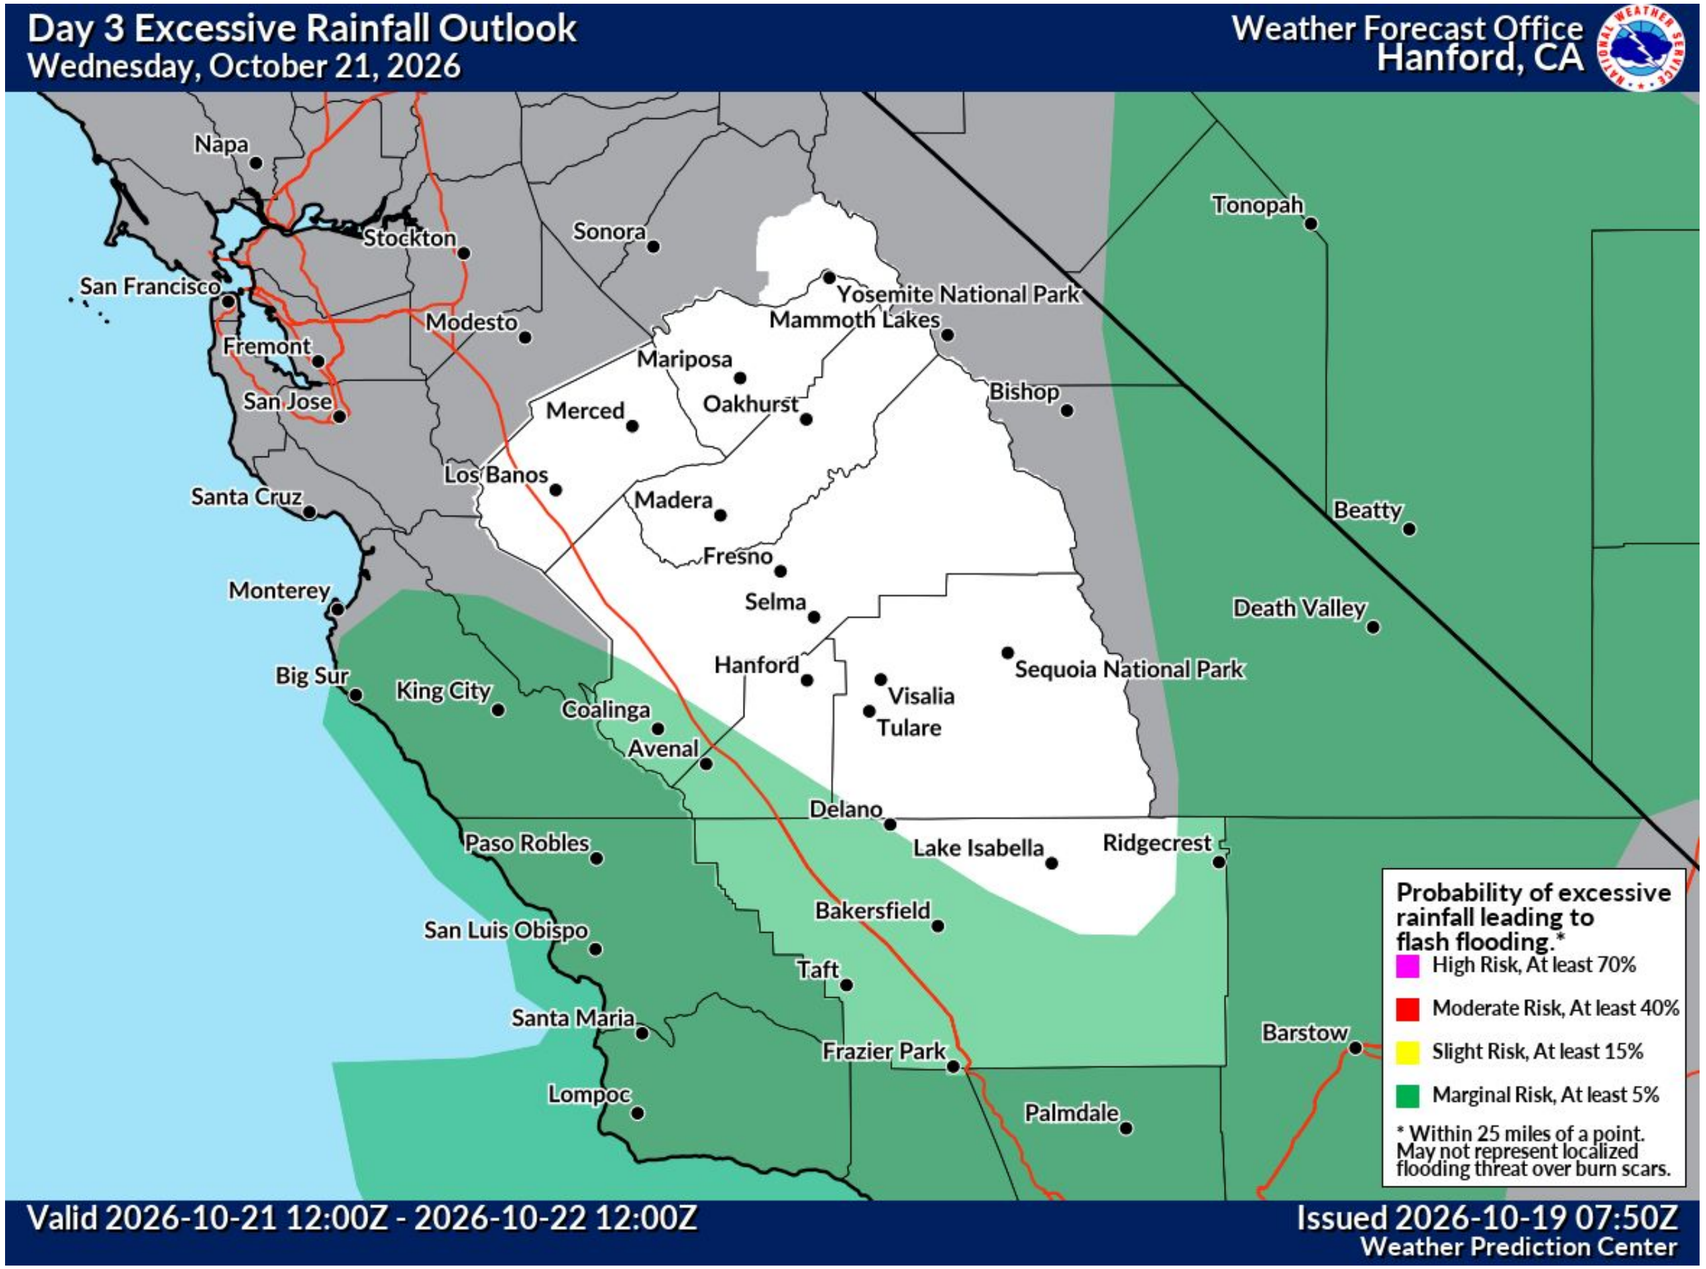

- Light rainfall is expected for the Valley and Sierra Nevada below 8000 feet and light snowfall above 8000 feet on Wednesday and Thursday.

- Current probabilities for a quarter inch of rainfall in the Valley is 40-60%, with similar chance for a half an inch of rainfall in the Foothills and lower Sierra. There is also a 50-75% chance for 4 inch of snow at the highest elevations of the Sierra Nevada.

- A slight chance for thunderstorms exists on both of these days, a 10-20% chance Wednesday afternoon and a 5-15% chance Thursday afternoon.
